

NCCC has an “open enrollment” admission policy to admit applicants who have graduated from an accredited high school or have a high school equivalency diploma. Students who have not completed high school will meet with an admissions advisor to discuss completing the high school equivalency at NCCC as well as other options.

At NCCC, students get high quality programs at a price they can afford. Our tuition is lower than any other college in the area, and many of our programs hold specialized accreditations. So employers and four-year schools know these are programs they can trust. Students here are supported in every way, and they have a wide range of programs to choose from that fit their specific goals.

Room A-167, Testing Center

3111 Saunders Settlement Rd.
Sanborn, NY 14132

NCCC ACCESSIBILITY SERVICES

HOW TO GET STARTED

1. Students seeking accommodations, academic adjustments, and/or auxiliary aids and services, must first make an appointment to meet with the Accessibility Services Program Administrator to register for support services. Appointments can be made at niagaracc.suny.edu/access or by calling 716-614-6728.
2. At this meeting the student should identify themselves as having a disability and should provide the AS Program Administrator with complete diagnostic testing and/or medical assessment documents from a qualified professional.
 - a. Acceptable documentation can include an IEP, psychological evaluation, 504 plan, detailed letter from a physician that diagnoses disability and explains how it affects the student’s academics, etc. The AS Program Administrator may also request further documentation to support the request for accommodations.
3. If the documentation is deemed adequate and provided in a timely manner (two weeks before classes begin), the AS Program Administrator will provide the student with a letter of academic adjustment on NCCC letterhead from Accessibility Services via student TWolves e-mail account prior to the start of the semester. Instructors will also be notified of academic adjustments.
